

## **Case Study**

The brief was to source a Finance Director for our client, a leading multinational, to join their team based in the UK.

## **Client profile**

Leading manufacturing multinational based in UK.

## **Job name**

Finance Director.

## **Job Role**

Our client was a leading manufacturing multinational seeking to hire a Finance Director to join their team based in the UK. The role had full responsibility for all financial management and accounting activities. In addition, it was an integral part of the senior management team, identifying opportunities and risks and helping to formulate the UK region's plan to deliver the Group's strategic and business objectives.

## **Job Responsibilities**

The brief was to source an experienced commercially astute finance leader with significant stakeholder management, FP&A, accounting and controlling experience at C suite level within a manufacturing business.

## **Method & Result**

We mapped the market both locally and internationally and approached 180 profiles. From this target we identified 18 candidates who were longlisted. From the candidate pool, seven candidates were forwarded of which five were selected for interview. Two candidates were identified as demonstrating the leadership skills and drive necessary for this challenging role. After a series of interviews and within six weeks from commencing the assignment, the position had been offered and accepted.
